DETAILED ACTION

1. Claims 16-31 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 9.

2. Claims 8, 9 and 11-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 12.

The traverse fails because applicant failed to state that the species are not patently distinct.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Boyer et al.

Note grooves 30.

4. Claims 3-7 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boyer et al in view of Pritchard et al or Gebhart or Spain.

It would have been obvious to add the teachings of aligning projections 470 of Pritchard et al or 20 of Gebhart or 19 of Spain. With regard to claims 5 and 7, only Gebhart and Spain apply. With regard to claim 6, the need for removability of the projections is immaterial to the operation of the system since no proof of criticality has been given. With regard to claim 10, the relationship of the distance between troughs to

the distance between discharge planes has not been proven to be critical to the operation of the claimed structure.
